

No matter what subject your production is about, I can translate it to high quality Portuguese without sharing data with AI.

Hi! My name is Walmir, and I've seen great opportunities for content creators who want to expand their productions to countries that speak Portuguese.

I've got a lot of experience with translations. Because of that, I can transcribe texts and subtitle videos properly with high quality language, that is similar to the original one as much as possible. The software used for edition is one of the most practical in the market and works offline, without sharing any of your content with AI. You can be sure the jobs will be accomplished privately without any spelling mistakes.

You can hire my services to translate either from English to Portuguese or from Portuguese to English. I am used to doing this kind of work, with more than 20 years of experience, having dealt with subjects such as business, finance, engineering, medicine, education, and even law.

I know AI can help some people who don't care about a few interpretation mistakes, action that will also remove the innovative status of their content. But, if you care about producing high quality material, it's necessary that you understand something crucial about proofreading productivity: when professionals have to revise translations – specially the ones provided by robots – they spend more time analyzing and fixing misinterpretations than just doing the whole job by themselves from scratch.

For many years, most of my activity was related to private English classes for people who had tried everything, but never managed to learn how to speak.

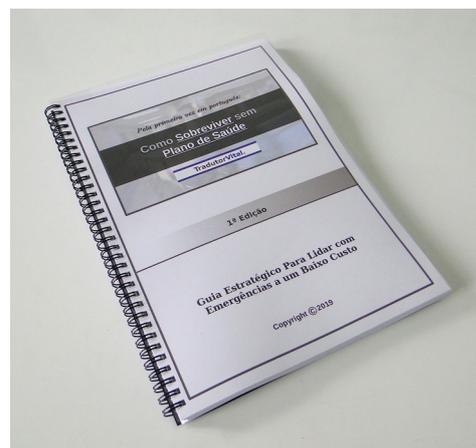

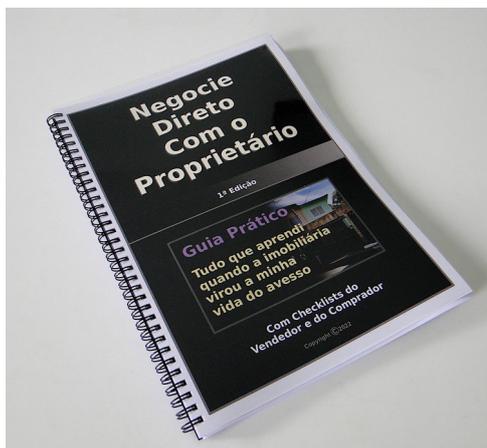

Along with that, as I mentioned before, I also worked with translations related to all kinds of subjects.

Between 2003 and 2009, I wrote all the 6 books of my methodology, something which required a lot of knowledge of English and Portuguese (being Portuguese the toughest part to review).

Yes, my methodology teaches students how to translate most of the time, so the books required a lot of attention to the Portuguese grammar.

I have also written other books in Portuguese like the ones bellow:

'Negocie Direto com o Proprietário', which is a guide to help people control the whole process of buying and selling houses and apartments without any help from real estate agents (ISBN 978-65-00-51823-8).

'Como Sobreviver sem Plano de Saúde', which is about strategies for people who can't afford good health insurance plans in Brazil (ISBN 978-65-80647-03-3).

I'm also writing a few books about medicine (not the conventional one), but that's a very long term project I've been developing during my free time.

Since 2018, I have been playing with subtitling by translating some of my personal videos. Actually, by doing that, I found out that it's an activity that I enjoy a lot, so I decided to get in touch with content creators like you and offer my services, considering that there is a great demand for this kind of work. I believe that with my skills I can help some YouTube channels in English reach a huge audience that is waiting for them here in Brazil (and also Portugal), since I can arrange everything they need in order to make that happen.

Here are the packages I provide:

I'm sure I can provide the best quality translations which, actually, are very hard for us Brazilians to see here, even when we watch some mainstream shows on cable TV (seriously).

Let's bring your content to my country soon!

See you!
